

# HOME. WORK. *Balance.*

**Home — it's where we sleep, where we play, where we relax and — sometimes — where we work and learn.**

You need a home that can be all that and more — a home that's perfect for you. Designs by Wilshire Homes are built around you and your needs. Our flexible floor plans allow you to have multiple home offices, study space for school-at-home and features such as built-in bookshelves for tidy storage of work- and school-related items.

High speed internet with direct ethernet connections will provide the best of both worlds — quality connections for important video work meetings and faster, more reliable connections for the kids whether doing schoolwork online or playing video games with friends.
